

# Futurewood Composite Decking

# Why use wood, when you can use Futurewood.

Futurewood is an eco-friendly, 100% recycled alternative to hardwood timber products. Made from recycled HDPE, rice husks and hardwood timber, Futurewood offers the illusion of a well-finished timber board, but is a wood plastic composite.

As well as being environmentally sustainable, Futurewood is also a low-maintenance alternative to timber. It does not require oiling, staining or painting, and will not rot, splinter or lose its colour.

**100%  
Replacement  
Warranty**

**100% Recycled**

**Eco-Friendly**

**Cost-Effective**

**Low  
Maintenance**
